

# Farnaz Towhidi . Jarvis Consulting

Full stack developer with years of experience in designing and developing user interface, testing, debugging, implementing components in amazing companies like IBM, Canadian Institute of Cyber Security and Biossentials. I always feel passionate about increasing the limits to academic knowledge thus my PHD and increasing the knowledge in General Assembly of Toronto.

## Skills

**Proficient:** Html/CSS, JavaScript, Agile/Scrum, MongoDB, SQL, MVC Pattern

**Competent:** OOP, MVC Pattern, MERN Infrastructure, Oath Authentication, REST APIs, Deploy GitHub, Heroku, Git, Git Hub

**Familiar:** Docker, fermentum, TestRail, Selenium, Jira

## Jarvis Projects

Project source code: [https://github.com/Jarvis-Consulting-Group/jarvis\\_data\\_eng-FarnazTowhidi](https://github.com/Jarvis-Consulting-Group/jarvis_data_eng-FarnazTowhidi)

**Cluster Monitor** [GitHub]: The project will be used by Jarvis Linux Cluster administrator (LCA) to manage 10 server nodes that connect to each other. They want the project to record hardware spec of each server, and real time resource usage, so the plan is to design one MVP for them. The project implements by bash script and PostgreSQL, Linux command line, docker and IDE. Manual testing done, by running the bash script and check the related tables to see if the data created properly.

**RDBMS and SQL** [GitHub]: Created SQL queries to retrieve data from multiple tables. A PostgreSQL instance using docker was utilized to load sample data and test the results of the queries. Git was used as version control for the project.

**Core Java Apps** [GitHub]: Developed proficiency in data access patterns and JDBC by performing data manipulation tasks on the hplussport PostgreSQL database. Utilized Dbeaver and IntelliJ Idea for database management, Docker for containerization, PostgreSQL and PSQL CLI tool for database creation and manipulation, JDBC for data access, and Maven for build automation.

## Highlighted Projects

**McDonald's Application** [GitHub]: Solo, 1 week project for DRY REST API of fully-functional styled inventory application. Technologies used, Express/Node and MongoDB, Python.

**Chatterbox** [GitHub]: Group of 4 developers creates a MERN stack application, a responsive single page application. Uploader with the use of AWS S3 buckets and the npm package, "aws-sdk". Technologies used, MongoDB, Express, React, Socket.io, Amazon Web Services.

**Track Fit** [GitHub]: Group of 5 developers creates a full crud application in 1 week, for recording the user's daily fitness log. Technologies used, HTML, CSS, Python, Django, PostgreSQL.

**War Card Game** [GitHub]: Solo, 1 week project for the browser base game, using application state, manipulating DOM and includes shuffling and win/loss logic. Technologies used, HTML, CSS and JavaScript.

## Professional Experiences

**Technical Consultant, Jarvis (2023-present):** Developed multiple software applications and worked on projects using Java, SQL, Linux Bash, Docker and more. Agile/Scrum was used to collaborate with team and produce minimum viable products. Git was utilized for version control on projects.

**Quality Assurance, IBM ,Fredericton (2020-2020):** Part of security intelligence team of 10 working on QRadar that ensured the testing algorithms and probability threat analysis was maintained at peak efficiency

**Full Stack Developer, Canadian Institute of Cybersecurity, Fredericton (2019-2019):** Designed and built website for International Conference on Privacy, Security and Trust, including information on events, workshops, organizers.

**Full Stack Developer, Biossentials, Kuala Lumpur (2009-2014):** Designed and built website for International Conference on Privacy, Security and Trust, including information on events, workshops, organizers.

## Education

**General Assembly (2022-2022)**, Software Engineering Immersive, Faculty of Computing - GPA: 3.9/4.0

**Universiti Teknologi Malaysia (2010-2015)**, PHD of Computer Science, Faculty of Computing - My thesis creates a dictionary by combination of top down and bottom visual attention of human brain, leads to creates more powerful automated dictionary attack.

**Universiti Teknologi Malaysia (2008-2010)**, Master of Computer Science (Information Security), Faculty of Computing - GPA: 3.65/4.0 - An Enhancement on Passface Graphical Password Authentication.

## Miscellaneous

- Computer Hacking Forensics Investigator (CHFI), EC-Council
- Certified Ethical Hacker (CEH), EC-Council
- Cloud Core, IBM
- Design and User Experience (D&UX), IBM
- Introduction to Cloud, IBM
- Enterprise Design Thinking Practitioner, IBM
- Tech-ReEntry, IBM
- Marketing your own Business on Internet, University of Waterloo
- Effective Selling, University of Waterloo
